Work experience

UX Designer/Developer – University of Waterloo IST Sept – Dec 2018

- Redesigned UWaterloo's official student portal app and created a design system by identifying and solving pain points in current design, notably improving navigation, and information and visual design
- Created a baseline, style guide and fully styled components using VueJS, Vuetify and CSS, speeding up the development process
- Directed user tests and research to iteratively validate and improve designs

Visual Designer – Ontario Institute for Cancer Research Jan – Apr 2018

- Led the redesign of directory website and improved information hierarchy, brand cohesiveness and responsiveness using brand guidelines and responsive web design principles
- Implemented and compatibility-tested fully responsive website and web app designs using HTML, SCSS, Bootstrap and Jekyll

Website Designer & Media Assistant – Halton Industry Education Council May - Aug 2017

- Created wireframes and revised site architecture to improve aesthetics and usability for company's website, and designed brand assets to promote company's various social media

Community involvement

StarterHacks Organizing Team – Tech and design liaison & designer Sep 2017 – present

- Designer on several different UX and visual design projects, including the main website, hacker application portal, dashboard, and various print and digital materials
- Assisted with the development of main website by being the first point in contact between designers and developers, performed design reviews, and aided in implementation using React

UW Entrepreneurship Society – Designer & project lead Sep 2018 – present

- Designed the Society's main website and other brand assets, and directed user tests to validate and iteratively improve designs

Women in Computer Science – Director of publicity Jan 2019 – present

- Promoted events and opportunities through social media outreach, and designed promotional material for web and print

Education

Candidate for Bachelor of Computer Science – University of Waterloo Sep 2016 – present
Specializing in Computational Fine arts
